

Jerzy Pogonowski has studied mathematics. He is a full professor at the Department of Applied Logic (Institute of Linguistics, Faculty of Modern Languages, Adam Mickiewicz University in Poznań). He has published a few dozens of works, including some books, devoted to: logical reconstruction of linguistic theories, methodology of sciences and history of logic. He teaches mathematical logic, metalogic, introduction to mathematics, recursive functions, logic, methodology of sciences, logical semiotics. In the Twentieth Century he was occupied with methodology of sciences and linguistics, recently he is interested in problems of logic. His academic works and teaching materials are accessible at: www.logic.amu.edu.pl

Prepared for publication are (in Polish): *Model Theory*, *Introduction to Mathematical Logic*, *Analytic Tableaux*, *Introduction to Mathematics* and a couple of translations.
